

# The Reactor Suppliers Lawsuit

(; '\_")/ A Trial against Makers of Nuclear Reactors L('o" )

Would you join in by becoming a plaintiff or a supporter of the litigation? Our action is to demand *General Electric (GE)*, *Hitachi* and *Toshiba* to give up their current monstrous business and transform it into an environmentally-friendly one.

Be part of  
the effort in  
freeing the  
world from  
NPPs!!

© NNAA

The meltdown incident that occurred at the Fukushima Daiichi Nuclear Power Plant has not ended (as of May 1, 2013). Nuclear reactors formerly in operation at the Fukushima NPP were produced by GE, HITACHI, and TOSHIBA.

Moreover, the "Act on Compensation for Nuclear Damage" in Japan prescribes that "a power supplier (or in this case Tokyo Electric Power Company [TEPCO]) should be exclusively required to take whole responsibility on any nuclear damage caused by an NPP accident." In other words, no reactor manufacturers are required to take any responsibility under the specified Act. If that's so, won't such a monstrous industry continue to exist even in the aftermath of the Fukushima incident?

Therefore all of us at No Nukes Asia Actions-Japan (referred to as NNAA) have planned The Reactor Suppliers Lawsuit to take action against the reactor manufacturers. We plan to file the litigation with the Tokyo District Court (TDC) in November 2013.

Our objectives:

- ☆ To make the "Act on Compensation for Nuclear Damage" a social issue.
- ☆ Claim the above NPR manufacturers to give up "their current monstrous business (called NPP business)" and transform it into environmentally-friendly one.
- ☆ Deliver our message worldwide, appealing the destructive nature of the NPR Monster to the public, as to "prevent such a monster from manifesting".

Note:

- \* Our specific claim to the TDC in the lawsuit includes: "Claiming 100 yen per plaintiff against the 3 NPR manufactures as compensation for spiritual damage of the world's plaintiffs, suffering said damage through watching the images of the Fukushima meltdown incident via mass media or the like.
- \* NNAA is gathering plaintiffs from all around the world. Information about defense lawyers for the plaintiffs is also available upon request.

**HOW ABOUT JOINING OUR ACTION BY BECOMING A PLAINTIFF OR SUPPORTER?**

### It' very simple to be a plaintiff ---

- 1) Fill all the blanks in the "Power of Attorney" form and those of the "Plaintiff / Supporter Application" form applicable to a plaintiff, and sign them.
- 2) Mail the forms, enclosed in an envelope to the following address:  
Reactor Suppliers Lawsuit Plaintiff Team  
Konan Residence, Room No.102, 1-18-14, Koenji-Minami,  
Suginami-ku,  
Tokyo 166-0003 (Japan)

\* Please e-mail us at **ermite@jcom.home.ne.jp** as well, so we can contact you efficiently!

(If you don't have e-mail, we will contact you via "conventional" mail.)

### To donate as a "supporter" ---

- 1) Fill all the blanks in the "Plaintiff / Supporter Application" form applicable to a supporter.  
\* Please be sure to include your email address as we may need to contact you about the proceedings of the litigation.
- 2) Submit the form via post enclosed to in an envelope to the following address, or you can **fax** it to us at this number: **+81-3-6765-3977**  
Reactor Suppliers Lawsuit Plaintiff Team  
Konan Residence, Room No.102, 1-18-14, Koenji-Minami, Suginami-ku,  
Tokyo 166-0003 (Japan)
- 3) Please transfer your donation via postal transfer to the account below, or send us a cheque to the address above.

### Our bank accounts:

- Japan Post Bank account transfer (Branch No. 028)  
Reference: 10210; A/C No: 43664091; Recipient name: ノーニュークス  
アジアアクションズ (No Nukes Asia Actions-Japan)
- Via postal transfer  
A/C No: 00290-5-125011; Recipient name: No Nukes Asia  
Actions-Japan

### REMARKS

Please note that once NNAA receives your fee or donation, it is non-refundable, regardless of the outcome made by the THC on the litigation.

Thank you for your kind acknowledgement in advance.

The application forms are all downloadable at

[http://ermite.just-size.net/nucleare/?page\\_id=372](http://ermite.just-size.net/nucleare/?page_id=372), or available upon request. Please contact us for more information.

Once NNAA receives your applications and confirms your payment or donation, we will inform you of our safe receipt.

[FAQ]

### Q: What is No Nukes Asia Actions?

A: No Nukes Asia Actions was formed in November 2012, as a grass-roots network for the world people. Our main purpose is to "realize a wonderful world without any nuclear weapons and nuclear power by international solidarity of people worldwide". No Nukes Asia Actions-Japan is the Japanese branch of this international network.

As of August 2013, its Tokyo Secretariat is serving the Reactor Suppliers Lawsuit Plaintiff Team, which has yet to have its own "physical" office!

### Q: Claiming 100 yen in compensation per plaintiff in the litigation, are you kidding?

A: No, we are serious! Our goal is to claim the 3 NPR manufacturers (GE, HITACHI and TOSHIBA) to give up the current monstrous business so as to transform it into an environmentally-friendly business.

100 yen is a symbolic price for our litigating action. The world needs a lot more lawsuits in addition to ours to make this happen, Consider filing your suit for "a world without nukes". If NNAA, can help you do so, please let us know!

### Q: What is the "Act on Compensation for Nuclear Damage"?

A: The law was enforced in 1961; part of its objective is "to contribute to the sound development of the nuclear power industry. (Our translation)"

However, the law prescribes articles far from the common sense of the public. In case of a nuclear accident, only the power operator is to be held responsible! Does such a law really comply with the Japanese Constitution?

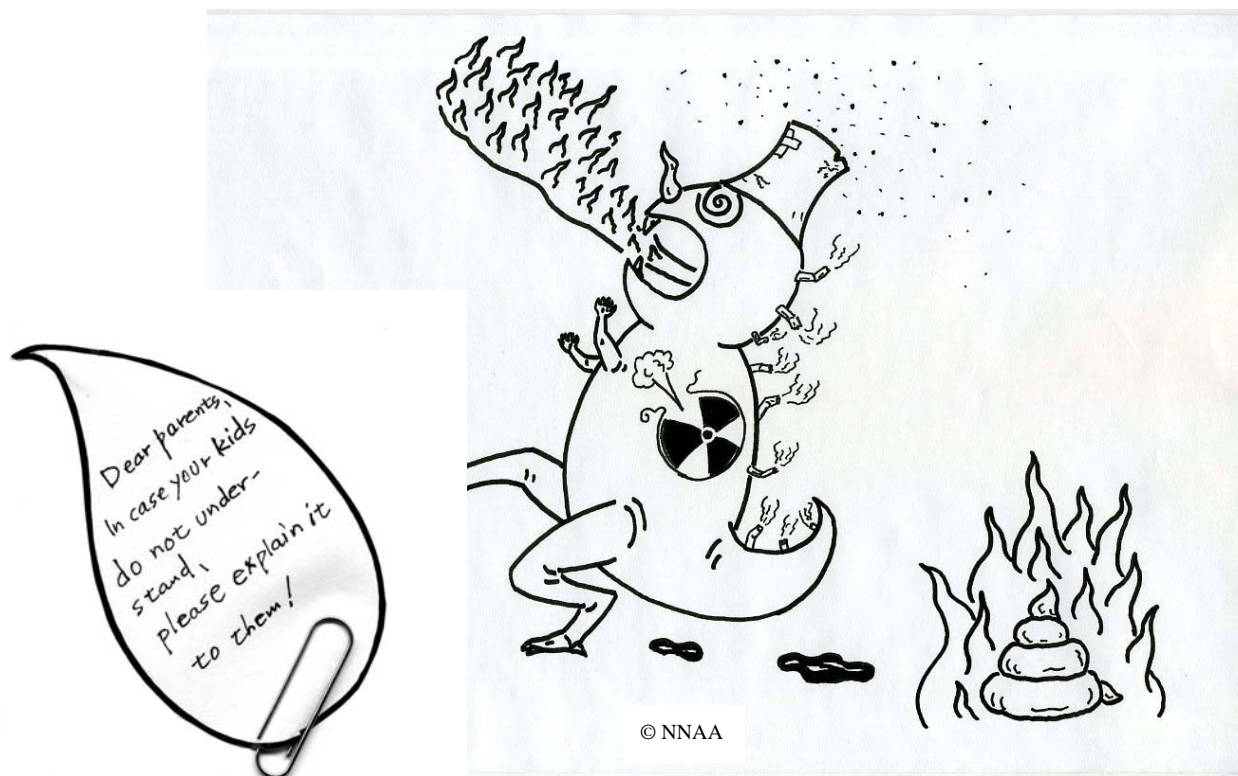

### \*\*\* Voluntary workers needed! \*\*\*

We, the plaintiff team, are in short of hands! There might be some things you can help us online – though such help is strictly "voluntary" and we are not able to pay you any wage.

If you are interested, please e-mail us at [ermite@jcom.home.ne.jp](mailto:ermite@jcom.home.ne.jp)

### Our Mascot

“FIRE POO”, our mascot for the Suppliers Lawsuit

<b>Common Name</b>	FIRE POO, The Meltdown Monster
<b>Scientific name</b>	Monstrum Liquesco Deorsum, Combustum Poo
<b>Height</b>	Approx. 55m (61 yards)
<b>Habitat</b>	Some 600 locations on the planet (as of May 2013) In its earliest stage, it existed in the former Soviet Union, Great Britain and North America. Later, its proliferation slowed down in both Europe and North America, though its propagation is still continuing in much of Asia, particularly East Asia.
<b>How it lives</b>	Mainly feeds on U238 with U235 mixed in. Some others feed on a mix of U and Pu239; those in India feed on thorium and turn it into U233. Occasionally goes out of control, “breathing fire” (explosions or meltdowns) and “burning poo” (corium) Even when under control, its “poo” is deadly toxic and lasts for millions of years. Probably, the first incidence of a FIRE POO breathing fire took place in Idaho, USA in 1955. Later, such hazards hit Pennsylvania, USA, Ukraine and Japan.
<b>Breeding</b>	A deadly apocalyptic monster. We should never let them exist on our planet. Still, there are some diehard pro-nukes addicted to breeding this deadly monster, with plans to turn it into a closely-related species, “Meena Gorothy” (a play on the Japanese word 皆殺し [mina-goroshi], meaning “genocide”).
<b>DNA phyloanalysis</b>	Fire Poo is an immediate pseudo-differentiation from the destructive nuke monster, “Meena Gorothy” (Genecidio nucleae). We call it pseudo-differentiation, since it all began with the hocus-pocus known as “Atoms for Peace.”
<b>Possibility of extinction</b>	Unless this monster is extinct, all other living things on the planet are in grave danger! However, some diehard pro-nukes are still breeding this monstrous species in East to South Asia.
<b>To annihilate it</b>	Of course, you can hold meetings and marches to voice your dissent against The Nuke Monster. We also hope many of you will come up with lawsuits against it! If you would like to, please join us in “The Reactor Suppliers Lawsuit,” as we spread the petition to the whole world that reactor manufacturers should stop monster-breeding and turn “green.”
